**NICOLAIDES & KOUNTOURIS
METAL COMPANY LTD**

Effective Support for Efficient Construction

ESTABLISHED 1977

seriousreliable**cost-efficient**

BUILDING RELATIONSHIPS

NICOLAIDES AND KOUNTOURIS METAL COMPANY LTD serves the construction industry by providing standard and custom-designed steel structures as well as cold formed steel sections, roof claddings and insulation panels.

With modern plants in the Geri Industrial Area just outside Nicosia, Cyprus, measuring over 17.000 m² including ample storage room, the Company is well equipped to meet the needs of local and overseas customers.

Our goal is not merely to act as suppliers, but above all to offer our clients practical advice at any stage of their project, from design to installation. By cooperating with **NICOLAIDES AND KOUNTOURIS METAL COMPANY LTD**, you can rest assured that you have found a serious and reliable construction partner; one who is committed to the delivery of quality solutions which will significantly contribute to the timely and cost-efficient completion of your projects.

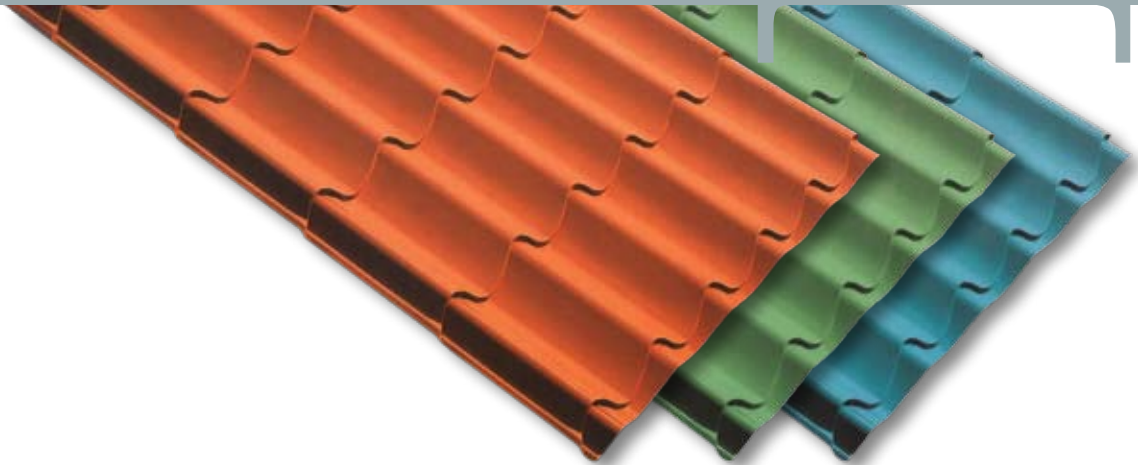

EXPERIENCE & TECHNOLOGY

Established in 1977, **Nicolaides and Kountouris Metal Company Ltd** offers you the benefits of decades of experience in the field. At the same time, and as a growing and forward-thinking company, we keep an eye on the latest technology, and incorporate it in our production lines in order to deliver the best possible material quality, durability, and energy efficient solutions.

Staff training goes hand-in-hand with the implementation of the latest European Recommendation for Steel Construction (including BS 5950) with stringent quality control at every stage of the manufacturing process.

By investing in both our personnel's skills and advanced technology, we have established our position as leaders in the market in Cyprus, while paving the way for overseas expansion.

high-spec large range

PRODUCTS FOR EVERY PURPOSE

Having invested heavily in the latest machinery and equipment, **Nicolaides and Kountouris Metal Company Ltd** currently produces a wide range of polyurethane and steel boards or panels for various purposes.

multi-purpose

POLYURETHANE PRODUCTS

For full specifications including dimensions, density, thermal conductivity and other technical qualities and features, visit our website at: www.nkmetal.com.cy

Our in-house production line delivers

Flat and Pitched Roof Systems with fire-approved high specifications are designed for industrial, domestic and architectural purposes.

Architectural Wall Systems of the highest standard can be incorporated into modern designs thanks to their positive visual impact with a vast range of colours for horizontal or vertical use.

Floor and Cavity Walls consist of a strong, lightweight, polyurethane closed-cell foam core with highly protective facings bonded to the foam during the manufacturing process.

Insulated Wall and Roof Cladding Systems with a large choice of panel profiles feature quality specifications that can compete with Europe's leading manufacturers.

ROLLFORMING

N&K Metal has established itself as a provider of a variety of roll formed sections for metal roof tiles, roof and wall claddings, steel beams, purlins and frames. Whatever the product, excellent cover is combined with aesthetic appeal to complement today's construction requirements.

Roof and Wall Claddings are designed and developed to provide an attractive appearance, good structural performance and easy installation. They come in transportable lengths, are suitable for double-skin site construction and can be arranged vertically or horizontally. Made of hot dipped galvanized steel, enhanced with a choice of colours and finishes.

Metal Roof Tiles manufactured from pre-painted hot dipped galvanized steel sheets are produced in various lengths and are suitable for industrial buildings, storehouses, car park and domestic use.

Eaves Beams and Sleeved System Zed Purlins provide support for all types of roofing systems and requirements.

Door and Window Frames are available in various types including Rolex, Mosaic, covered and uncovered designs.

For full technical details such as physical properties, spacing, sequencing, laying order, load capacities, standard holing, load tables, installation guidelines and recommended applications, visit our website at: www.nkmetal.com.cy

STEELWORKS

In addition to supplying various components used in the construction industry, **Nicolaides and Kountouris Metal Company Ltd** also has an excellent track record in the design, manufacturing and installation of heavy duty steel constructions for commercial, private or public use.

Serving the construction industry as well as private individuals - whether the project calls for in-house design or the implementation of already completed architectural and structural drawings - the company specializes in:

Industrial Buildings

Domestic Buildings

Metal Roofs

Sports Centres

Farm Shelters
